**Exam** : **000-N20**

**Title** : IBM Rational Enterprise Modernization Technical Sales Mastery Test v1

**Version** : Demo

1.Which programming language is used in approximately 80 percent of legacy mainframe applications?
A. Visual Basic
B. C/C++
C. COBOL
D. Java
**Answer:** C

2.An enterprise customer's application development projects are often delayed because their production workload causes their System z servers to run at 100 percent utilization for extended periods of time.
Which capability of the IBM Integrated Solution for System z Development best meets this customer's needs?
A. test mainframe applications on an x86 Linux server
B. queue application testing to run during non-peak hours
C. access IBM System z application test servers in the cloud
D. fine tune server resources to find balance between development and production
**Answer:** A

3.What is ISPF in z/OS?
A. batch application type
B. development environment
C. programming language
D. data storage system
**Answer:** B

4.Which feature of IBM Rational Developer for System z simplifies the development of SOA web services?
A. embedded ISPF client
B. WebSphere integration
C. workstation syntax checking
D. Enterprise Service Tools
**Answer:** D

5.What is the fundamental mechanism in Rational Team Concert for tracking and coordinating development tasks?
A. work items
B. source configuration management
C. links
D. artifacts
**Answer:** A

6.A customer wants to simplify the process of connecting their traditional mainframe applications with Web 2.0 front-ends.
Which feature of IBM Rational Developer for System z best meets their needs?
A. EGL

B. CICS Service Flow
C. Service Component Architecture
D. Unit Test
**Answer:** A

7.An organization currently uses a mainframe based SCM. They want to deploy the IBM Integrated Solution for System z Development.
What are two advantages of choosing SCM coexistence rather than replacement? (Choose two.)
A. rapid deployment and ROI
B. phased implementation
C. reduced legacy software costs
D. full traceability
**Answer:** A,B

8.How does workstation syntax checking reduce host CPU usage?
A. requires fewer program compiles on z/OS
B. reduces the lines of code to be processed
C. lowers skill requirements for development
D. replicates z/OS on an x86 Linux server
**Answer:** A

9.What are two drawbacks to ISPF green screen tools for mainframe application development? (Choose two.)
A. They require constant connection to the mainframe.
B. They are designed narrowly for cross-platform projects.
C. They share mainframe resources with production.
D. They are designed only for maintenance,not development.
**Answer:** A,C

10.Which Rational Team Concert feature enables a simple way of sharing change sets among members of a team?
A. dashboards
B. streams
C. parallels
D. snapshots
**Answer:** B
