Exam : 2V0-17.25

**Title : VMware Cloud Foundation
9.0 Administrator**

Version : DEMO

1.Which VMWare Cloud Foundation (VCF) Automation component provides a self-service catalog in the VM Apps tenant?

- A. VCF Service Broker
- B. VCF Config
- C. VCF Assembler
- D. VCF Operations Orchestrator

Answer: A

2.A security team informed an administrator that a VMware vCenter root password was compromised. As a precaution, the password was changed directly in vCenter.

What should an administrator do to regain management capability of this vCenter by VMware Cloud Foundation (VCF) Operations?

- A. Use the Rotate password function in VCF Operations.
- B. Enter the new root password using the Reset password function in VCF Operations.
- C. Enter the new root password using the Remediate password function in VCF Operations.
- D. Enter the new root password using the Update password function in VCF Operations.

Answer: C

3.An administrator is responsible for managing a VMware Cloud Foundation (VCF) Automation organization within a VCF instance.

The administrator has been tasked with updating an VMware NSX VPC by editing the NSX Connectivity profile for an NSX Project.

The current profile was generated automatically when the NSX VPC was created.

What is the impact of the administrator making this change to the NSX VPC?

- A. All NSX VPCs associated with the VCF Automation organization will be updated with the new VPC connectivity profile.
- B. All NSX VPCs that use the default VPC connectivity profile will be updated with the new VPC connectivity profile.
- C. Only the selected NSX VPC will be updated with the new VPC connectivity profile.
- D. Only the NSX VPCs within the corresponding NSX Project will be updated with the new VPC connectivity profile.

Answer: C

4.An administrator is tasked to obtain an overview of all VMware vSAN and non-vSAN datastores within a VMware Cloud Foundation (VCF) environment using VCF Operations.

Where can the administrator access the required information?

- A. Data Protection & Recovery
- B. VCF Health
- C. Diagnostic Findings
- D. Storage Overview

Answer: D

5.An administrator has been tasked with deploying a new VMware Cloud Foundation (VCF) instance using a supported VCF Operations model that has the smallest possible resource footprint.

Which VCF Operations deployment model should the administrator use?

- A. Continuous Availability
- B. High Availability
- C. Simple
- D. Stretched Cluster

Answer: C
