Title : SAP Certified Associate - Positioning SAP Sustainability Solutions as part of SAP Business Suite

Version : DEMO

1.What is the main purpose of SAP Responsible Design and Production?
A. To use generative AI to design more sustainable products.
B. Designing products with environmental and social impacts in mind (life-centered design).
C. Managing plastic taxes and Extended Producer Responsibility regulations.
D. To ensure that during the transition from ethical product design to final production, no negative environmental problems occur.
Answer: C

2.How can AI help businesses meet ESG standards? Note: There are 3 correct answers to this question.
A. By enabling businesses to create a story that most enhances their green story.
B. By accelerating processes to save time and reduce risks associated with ESG reporting.
C. By amplifying expertise through predictive insights and recommendations.
D. By automating complex and time-consuming tasks.
E. By ‘outsourcing’ all sustainability activities to AI and allowing employees to concentrate on their core business.
Answer: B,C,D

3.Which of the following are capabilities of SAP Green Ledger?
Note: There are 3 correct answers to this question.
A. Planning and simulating the impact of plastic packaging.
B. Ensuring traceability and audibility in carbon accounting.
C. Applying financial principles to greenhouse gas data.
D. Drilling down into revenue, cost, and emissions.
E. Tracking biodiversity loss at a transactional level.
Answer: B,C,D

4.Which of the following represents the current market state for sustainability solutions according to SAP?
A. Most major innovation has been done and solutions are becoming commoditized. Therefore, SAP competes mainly on price and not capabilities.
B. Pure-play vendors are just starting to enter the market, and SAP has an opportunity through integrated business processes and data, and also its extensive AI portfolio.
C. The sustainability solutions market is still developing, with significant potential for growth and evolution. This stage of maturity provides SAP with substantial opportunities to shape and dominate the market.
D. The sustainability solutions market has minimal competition, as SAP’s competitors are still evaluating their response to growing regulation.
Answer: B

5.What business risks do customers face if they avoid engaging with their corporate sustainability challenge according to SAP? Note: There are 3 correct answers to this question.
A. The risk of increased compliance costs, associated with the increasing number and scope of sustainability regulations.
B. The risk that productivity drops due to increased temperatures.

C. Difficulties in attracting and retaining talent who are concerned with sustainability issues.
D. The risk that their plants and buildings end up exposed to flooding and other climate impacts.
E. The risk of reputational damage as customers increasingly choose to move to companies more aligned with their sustainable values.

Answer: A,C,E
